renbriel44@gmail.com
github.com/RenzoLaporno
Bgy. Quezon, Arevalo, Iloilo City, Philippines

EDUCATION

Central Philippine University

Bachelor of Science in Software Engineering
2019–2025

SKILLS

Programming Languages:

- Javascript
- Typescript
- Python
- Dart
- Vue
- C#
- Bash

Front-End Development:

- React.js
- Next.js
- Astro
- Quasar
- Server-Side Rendering (SSR)
- Responsive Web Design

Back-End & Full-Stack:

- Node.js
- Express.js
- MERN Stack
- RESTful API Design & Development
- Authentication & Authorization

Cloud & DevOps:

- Firebase
- AWS
- Render
- Git & Version Control

Software Development:

- Scrum Methodology
- SDLC
- Code Review & Documentation
- Problem Solving & Debugging

PROFESSIONAL EXPERIENCE & PROJECTS

Software Engineer – Full Stack Developer

Prometheus PH | June 2025 – Present

Tech Stack: React, Next.js, TypeScript, Node.js, Firebase, AWS

Key Responsibilities:

- Spearheaded multiple full-stack projects from conception to deployment, ensuring adherence to best practices and modern software engineering standards.
- Led solo projects with full ownership of architecture, implementation, and delivery.
- Modernized legacy HTML/JS systems into secure, robust modern frameworks, improving maintainability and security posture.
- JCI Regatta Iloilo: Redesigned and developed a premium website with modern animations and mobile-first layouts using React and Astro.
- Architected and implemented scalable solutions that enhance system performance and user experience.

Freelance Web Developer

Self-Employed | 2024 – Present

Tech Stack: React, Astro, Next.js, Firebase

Key Responsibilities:

- Meisner Institute: Designed and developed a modern, responsive website delivering a polished UX aligned with the organization's brand identity.

Software Engineer Intern

Trajector | October 2024 – March 2025

Tech Stack: React, Node.js, MERN Stack, AWS, Azure AI, Bash

Key Responsibilities:

- RCA: Automated ticket creation from ConnectWise to AHA!, deployed on AWS for improved scalability.
- Testpilot: Developed test cases utilizing Azure AI, enhancing testing efficiency and accuracy.
- Applicant Database: Built a comprehensive applicant management system using the MERN stack with AI-powered resume parsing and analysis.
- Onboarding Script: Wrote Bash scripts to automate app installations on macOS and Windows, streamlining onboarding processes.

Frontend Developer

Kachick | February 2024 – June 2024

Tech Stack: Next.js, Firebase, Javascript

Key Responsibilities:

- Spearheaded development of a fully functional website from scratch using Next.js.
- Assisted in deploying and maintaining the website leveraging Firebase for hosting.
- Collaborated with the tech lead to develop a mobile-first web platform.

Play Robos

Central Philippine University | Full Stack Developer

Tech Stack: React, Node.js, block-based programming

Key Responsibilities:

- Developed a robotic and programming learning platform designed to enhance students' programming logic through a block-based Scrabble-inspired coding approach.
- Built the full-stack architecture handling both front-end and back-end development, ensuring a seamless and interactive user experience.
- Implemented a drag-and-drop block-building system that allows learners to construct programming logic visually, lowering the barrier for beginner programmers.
- Designed the platform with gamification principles to motivate learners and reinforce computational thinking through hands-on robotic simulations.
